Quarterly fund commentary

Asian equity markets rallied thanks to positive earnings growth revisions and solid global economic expansion. In China, upbeat 3Q results led to higher earnings expectations in the internet and industrial sectors. Elsewhere, Indian equities were supported by the Bharatiya Janata Party's victories in state elections and the planned recapitalisation of the state-owned banks, while the Korean market was helped by an agreement with China, which normalised relations post the installation of the US anti-missile system, and strong 3Q GDP growth. Taiwan ended the quarter higher but parts of the market exposed to Apple's supply chain suffered due to lukewarm demand for iPhone X and iPhone 8. The fund is a concentrated portfolio, with a focus on investing in companies whose share prices are substantially below our estimate of fair value. The fund has a high weighting in Chinese internet companies while a notable exposure in South Korea reflects our belief that companies are likely to adopt shareholder-friendly policies. We introduced holdings in: an insurance company as we expect rising premiums to lift profits; a Chinese fertiliser and chemical manufacturer as we believe its outlook is attractive given the supply side restructuring in the Chinese fertilizer industry; and a Chinese telecommunication services company which is out of favour due to the lull in telecom capex before the introduction of 5G.
