Quarterly fund commentary

Global equity markets ended the year near all-time highs amid solid corporate earnings and synchronised global economic growth. US Federal Reserve (Fed) chair Janet Yellen told the Joint Economic Committee: "The economic expansion is increasingly broad based across (US) sectors as well as across much of the global economy." Equity market performance in December helped global equity markets achieve their best annual performance since the post financial crisis recovery. The Fed increased interest rates in December, as was widely anticipated. Though it was President Trump's end-of-year tax-cutting package and promised infrastructure spending which boosted equity market returns globally and not just in the US. The performance of the UK and European equity markets was largely driven by the oil & gas as well as the mining sectors. They had benefited from a sharp improvement in copper prices, buoyed by demand in China and strengthening global economic growth. The fund's strategy is to look for what we view as high quality companies at attractive valuations. We seek to invest in businesses that provide an attractive yield, a sustainable and growing level of income and capital upside potential. By quality, we refer to businesses that generate high and sustainable returns. We believe that these types of companies are more likely to be able to return cash to investors in the form of growing dividends.
