LFP S&P Capital IQ Fund – LFP R2P Global Credit-Class I GBP LU0928533578

a sub-fund of the UCITS LFP S&P Capital IQ Fund
The Fund is managed by La Française AM International,
part of La Francaise group of companies

Objectives and Investment Policy

The objective of the Fund is, for the recommended investment period, to outperform the Barclays Global Aggregate Corporate Hedged £ index.

The Fund invests in money market products and debt instruments (corporate bonds, senior or subordinated bonds, fixed or floating rate bonds, convertible bonds, negotiable debt instruments, certificates of deposit, etc.).

Investments shall be made in accordance with the following characteristics:

- all Member States of the OECD countries;
- mainly Investment Grade securities (issuer's rating greater than or equal to BBB- on the Standard & Poor's rating agency scale);
- high yield or non-rated securities: up to 10% of the assets.

Exposure to stock markets' risk shall be limited to 10% of the assets. Investors are not exposed to exchange risk, as the management includes systematic hedging to exposure to exchange. However, a residual exchange risk may persist, resulting from imperfect currency hedging of underlying assets.

The Fund can also invest up to 10% of its net assets in shares or units of UCITS and/or other UCIs. The Fund may hold ancillary liquid assets.

To achieve its objectives, the Fund may use derivatives [listed, non-listed, firm or optional, rates indexes, CDS (Credit Default Swap)] to increase or decrease the impact of fluctuations in financial markets on the Fund's performance. These transactions are carried out with no more than the total value of the assets of the Fund.

The Fund may invest up to 100% of its assets in securities and money market instruments of different issues, issued or guaranteed by an OECD Member State.

You can sell shares of the Fund on a daily basis.

All income generated by the Fund is reinvested and included in the value of its shares.

Recommendation: This Fund may not be appropriate for investors who plan to withdraw their money within 3 years.

Risk and Reward profile

Risk and Reward Profile: The SRRRI (Synthetic Risk and Reward Indicator) demonstrates where the Fund ranks in terms of its potential risk and return. The higher the Fund's position on this scale, the greater possible reward, but also the greater risk of losing money.

The risk category is 3, which reflects investments in "investment grade" debt instruments, in all geographical areas, in the private sector.

We bring your attention to the fact that:

- Historical data used in calculating the SRRRI may not be a reliable indication of the future risk profile of the Fund.

- The risk indicator shown above is not guaranteed and it may shift over time. The lowest category does not mean a risk free investment.

Risks materially relevant to the Fund which are not adequately captured in the indicator:

Risk linked to the impact of management techniques: risk of increased losses owing to the use of financial futures instruments

such as OTC financial agreements, and/or the temporary acquisition and transfer of securities, and/or futures contracts, and/or derivative instruments. This risk may lower the net asset value. Credit risk: the Fund can invest in debt securities. There is a risk that the issuer may default. The likelihood of this happening will depend on the credit-worthiness of the issuer.

Counterparty risk: the Fund enters into contracts with various counterparties. If a counterparty does not fulfil its obligations to the Fund (e.g. not paying an agreed amount or not delivering securities as agreed) the Fund can suffer a loss.
