

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

LFP Opportunity - Euro Short Duration High Yield -Class I EUR LU0785579664

a subfund of the UCITS LFP Opportunity
The Fund is managed by La Française AM International,
a company within the La Française Group

Objectives and Investment Policy

The fund is actively managed and aims to increase the value of its shares by increasing the value of its investments.

The fund invests mainly in:

- bonds issues by companies with their head office in OECD countries and with a rating between BB+ and B- (Standard & Poor's) or between Ba1 and B3 (Moody's), commonly known as "high-yield bonds". It may, on an ancillary basis, invest in bonds with a rating of CCC (Standard & Poor's) or Caa (Moody's);
- credit default swaps: these are contracts between a protection buyer and a protection seller in order to transfer the risk of non-payment on the part of the issuer of a debt instrument.

The Fund may also use derivatives to reduce the impact of fluctuations in exchange rates and/or interest rates on its performance.

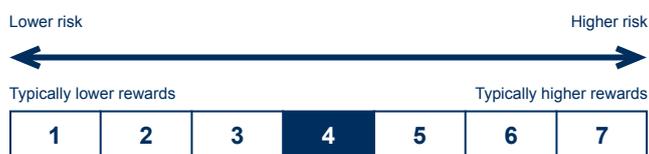

Fund shares can be sold on a daily basis.

Fund shares can be bought, sold or converted on a daily basis.

All the income generated by the Fund is reinvested and included in the value of its shares.

Recommendation: this fund may not be suitable for investors who intend to withdraw their capital within 3 years.

Risk and Reward Profile

Risk and Reward Profile: The Synthetic Risk and Reward Indicator (SRRI) shows the ranking of the fund, depending on its potential risk and reward. The higher the fund is on this scale, the higher its return. However, this means that there is a considerable risk of loss.

The risk category is 4 as investments in high-yield bonds are generally subject to high price fluctuations.

Please note that:

- The historic data used to calculate the SRRI is not necessarily a reliable indicator of the fund's future risk profile.
- The risk indicator shown below does not provide any guarantee and may change over time. The lowest category does not mean that investment is risk-free.

Important risks relating to the fund which are not entirely taken into consideration by the indicator:

Interest rate risk: a rise in interest rates may lead to a fall in the value of the securities held by the Fund. There is an inverse relationship between bond prices and interest rates;

when interest rates go up, bond prices go down.

Credit risk: the Fund may invest in debt securities. There is also the risk that the issuer will default on payment. The probability of such an event depends on the solvability of the issuer.

Risk associated with high-yield bonds: the Fund invests in low-quality bonds, which may generate more income than first-rate bonds, but presents a higher level of risk for your capital.

Risk related to selection: the Manager's judgement with regard to the appeal, value and potential growth of a particular security may turn out to be incorrect.

Charges

The charges that you pay are used for paying the costs of running the fund, including marketing and distributing costs. These charges reduce the growth potential of your investment.

One-off charges taken before or after you invest	
Entry charge	3.00%
Exit charge	None

This is the maximum that might be taken out of your money before it is invested or before the proceeds of your investment are paid out.

The entry and exit charges are the maximum amounts. In some cases, you might pay less – please speak to your financial adviser regarding this issue.

Charges taken from the fund over a year	
Ongoing charges	0.61%

The amount shown here is an estimate of said charges. For each financial year, the UCTIS' annual report will state the exact amount of the incurred charges.

Charges taken from the fund under certain specific conditions	
Performance fee	0.24%

The performance fee is equivalent to 15% of any performance above the 3 month Euribor rate + 2%, provided that the performance exceeds the value of the Fund's highest net assets (per share) it had previously achieved (high water mark). The Fund shall pay the performance fee once per year.

Please refer to Section VII and Annex 1 to the prospectus of the UCITS for more information about these charges. The prospectus is available from the head office of the UCTIS.

Past Performance

■ LFP Opportunity - Euro Short
■ Duration High Yield Class
I EUR

There is not enough data to provide a reliable indicator of past performance.

This fund was launched during the year 2013.
