LYXOR UCITS ETF IBOXX \$ TREASURIES 1-3Y (the "Fund")

ISIN: FR0010960955 - A sub-fund of the investment company named MULTI-UNITS FRANCE (the "Company") domiciled in FRANCE.

Managed by Lyxor International Asset Management ("LIAM")

Objectives and investment policy

The investment objective is to track both the upward and downward evolution of the iBoxx \$ Treasuries 1-3Y Index (Bloomberg code: ITRR1T3) ("Benchmark Index"), representative of US government bonds ("Treasuries") within the 1-3 year maturity range

The anticipated ex-post tracking error under normal market conditions is 0.02%.

The Fund seeks to achieve its objective via indirect replication, i.e. by entering into an over-the-counter swap contract (forward financial instrument, the "FDI"). The Fund will invest in a diversified portfolio of international debt securities, the performance of which will be swapped against that of the Benchmark Index via the financial futures.

An up-to-date breakdown of the Fund's investment portfolio is provided on the website www.lyxoretf.com. The indicative net asset value is also shown on the Fund's Reuters and Bloomberg pages, and may also be mentioned on the websites for markets where the Fund is listed.

The share currency is the US Dollar (USD).

- **Financial instrument investments:** international debt securities, financial futures, UCITS, and other financial instruments.
- **Classification:** Bonds and other international debt securities.
- **Dividend policy:** the Fund distributes and/or reinvests its distributable amounts.
- **Net asset value:** on a daily basis, providing that the stock exchanges where it is listed are open for trading and orders can be covered.
- **Redemption:** Investors may redeem their shares on the primary market each valuation day before 17.00 CET and sell their units on the secondary market at any time during trading hours on the exchanges where the Fund is listed.

Risk and return profile

The risk category mentioned above is based on historical data and is not representative of future categorization. As a result, this risk estimation may not be a reliable indicator of future risk and may be subject to change over time. The lowest category does not mean risk free investment. Resulting from its exposure to the Benchmark Index, the Fund has been classified within category 2. Category 2 indicates that a capital loss is possible, but very unlikely under normal market conditions.

Material risks for the Fund not covered by the above indicator, which could lead to a decrease in the net asset value of the Fund, and which the Fund is authorised to disclose in this document (for more details about risks, please refer to the Risk Profile section of the prospectus):

- **Counterparty risk:** The Fund is exposed to the risk of bankruptcy, or any other type of default of the counterparty related to any trading transaction entered into by the Fund. According to the UCITS regulations, this risk cannot exceed 10% of the total of the Fund's assets, for a given counterparty.
- **Risk of using FDI:** In order to reach its investment objective, the Fund enters into over-the-counter FDI which provide the performance of the Benchmark Index. The FDI could be affected by various risks such as change in law or tax events.
- **Issuer credit risk:** The Fund could be affected by the change in an issuer's credit quality (which would alter the risk of the issuer defaulting and affect the value of the bonds in question).
