### Risk and return profile

The risk category mentioned above is based on historical data and is not representative of future categorization. As a result, this risk estimation may not be a reliable indicator of future risk and may be subject to change over time. The lowest category does not mean risk free investment. Resulting from its exposure to the Benchmark Index, the Fund has been classified within category 6. Category 6 indicates that it is possible to suffer a severe loss of capital under normal market conditions; the value of your investment may change substantially and experience quite large daily upside or downside variations.

Material risks for the Fund not covered by the above indicator, which could lead to a decrease in the net asset value of the Fund, and which the Fund is authorised to disclose in this document (for more details about risks, please refer to the Risk Profile section of the prospectus):

- **Counterparty risk:** The Fund is exposed to the risk of bankruptcy, or any other type of default of the counterparty related to any trading transaction entered into by the Fund. According to the UCITS regulations, this risk cannot exceed 10% of the total of the Fund's assets, for a given counterparty.
- **Risk of using FDI:** In order to reach its investment objective, the Fund enters into over-the-counter FDI which provide the performance of the Benchmark Index. The FDI could be affected by various risks such as change in law or tax events.
- **Liquidity risk:** The Fund is exposed to small-cap companies, more specifically stocks from the equity markets of Small and Medium-sized Enterprises (SMEs) and to mid-cap companies, which may increase market and liquidity risks. As a result, upward or downward market movements are more pronounced and occur more quickly than for large-cap stocks. The net asset value of the Fund may behave in an identical manner, thus falling more quickly and sharply than a similar investment in large-cap stocks.

**Fees**

The fees that you pay are used to pay the costs of running the Fund, including the cost of marketing and distributing it. These fees reduce the potential growth of your investment.
